INVESTITURE CEREMONY 2025

Investiture Ceremony for the 2025-26 session took place on July 19, 2025. This year, we were honoured to welcome distinguished alumni, Mr. Aditya Awasthi and Mrs. Sakshi Maheshwari, former Head Boy and Head Girl from the 2010-11 batch, as our Guests.

AWARDS & ACHIEVEMENTS

Inter House Soft Board Decoration Competition was held on July 15, 2025 and Neer House bagged the first position.

Adway Sharma and Saksham Tyagi participated in CIMUN and won Verbal Mention and Special Mention

Maitri Pathak secured the Second Position at the District Level and has been selected for the State Level of the INSPIRE MANAK Awards 2023-24

Outstanding achievements of our brilliant students in Erudition - Literary Fest and CIMUN - Jantantra

Saavi Tomar of Class V represented the School at the Shri Basantilalji Memorial Swimming Championship and secured the Third position in 100 meters Individual Medley and 50 metres backstroke.

Amogh Sarmandal of Class VII has secured 3rd runner up position in UCMAS MP State Level Listening Competition-2025

Amogh Sarmandal of Class VII was felicitated for his Outstanding Performance in the Karate Championship organized by Funakoshi Shotokan Academy

Anavi Saxena of Class XI and Yashvir Singh of Class X were appreciated for confidently compering the Investiture Ceremony.

Our school Basketball and Volleyball teams have achieved an outstanding performance at the 2nd Talent Cup Inter-School Championship held at IPS School from July 28 - July 30, 2025.

CONCLAVE

The AWAKE Club - Primary Department organized a Hasya Yoga session for children, conducted by a renowned stalwart in the field of yoga — Bala Chandra Ji and his team.

A Videoconferencing Session was organized between our school and Jeonju Bukil Elementary School, Republic of South Korea.

We had the privilege of hosting Mr. Ansh Jain, CEO of YouthGenex, for an engaging and thought-provoking session with our senior students.

An insightful session was conducted for our teachers on Understanding Socio-Emotional Learning (SEL) by school counselors.

We were honoured to host Mr. Tanmay Mukherjee, a dynamic speaker and thoughtful leader, for an engaging and insightful session on Idea Generation.

An inspirational guest lecture was organized for the students of Class IX at our school. The lecture was presented by Dr. Vandana Singh-a distinguished parent

On July 23, 2025, a Traffic Awareness Session was conducted in our school for the bus drivers and transport staff by Shri Manoj Kumar Khatri, ACP Traffic, Indore.

We were honoured to have Ms. Shuchita Sethi, a talented parent and skilled calligraphy artist, as the resource person. for Creative Calligraphy Workshop

Under Parent Involvement Program, our eager learners, between the ages of 6 and 8, were introduced to the fascinating world of AI through an engaging session led by Dr. Kavita Deshmukh.

An informative session was held for students (VI -VIII) on July 23, 2025, by Bharatiya Shikshan Mandal, Malwa Prant, to highlight the importance of the Guru-Shishya tradition in Indian culture by Dr. Sandhya S. Chouksey

A session on "Mental Health Matters: Breaking Stigma" by Mr. Ajit Kumar - Counselling Psychologist.

CELEBRATIONS

Monsoon Celebration

Montessori children celebrated the joy and beauty of the monsoon season! The day was filled with fun and learning as they explored what we see during monsoon—rain, puddles and rainbows!

Welcome Party

To mark the start of the academic session, CSNC organized a cheerful and heartwarming welcome party for our shining stars.

Guru Purnima

The auspicious occasion of Guru Purnima was celebrated in CSNC with reverence and enthusiasm. The entire program beautifully conveyed the spirit of Guru Purnima and paid tribute to the guiding lights of our lives — our teachers.

International Plastic Free Day

The event aimed to raise awareness about the importance of reducing plastic waste and promoting sustainable practices.

ACTIVITIES

The OUTREACH Club hosted a beautiful Rakhi Exhibition, where the creative talents of students from Anubhuti Vision Seva Sansthan were on full display.

The exhibition took place in the assembly quadrangle and went off without a hitch.

Under the National School Paryavaran Competition (NSPC), an awareness session was successfully organized by the Nature Club.

Chinmay Ashram successfully organized Geeta Shlok Competition at our school and 80 students (Nursery-X) participated enthusiastically.

The Deepest Friendship

In the first class when we met for the first time It seemed like we found our best friend. And it's true, we are best friends! As the days passed, our bond became stronger and stronger. Then we moved on to class 2 and, in class 2 we kept getting same ideas and we thought we were twins! Then in class 3 we got to know that it is called telepathy. In class 4 our telepathy went deeper and deeper. Today we are going to share a really funny incident about telepathy. English ma'am told us to write a paragraph and gave us options - your friend , summer break. we both chose the topic "your friend" without any discussion. After writing we both exchanged our copies as usual and we were surprised to see each other's copy, they were almost same! We looked each other with mixed feelings and that was the best moment. The story doesn't end here. We don't know what will happen in future but we promise we will share more interesting and joyful incidents. Adapted from real life story of Aura and Rousheen.

कितना निश्चल, कितना चंचल
कितना प्यारा है यह बचपन।
दादी, नानी और माँ की
आँखों का तारा है यह बचपन।
बच्चों को यह चाँद और तारे
सूरज भरमाते हैं।
पूछें तरह-तरह की बातें
यह सब कहाँ से आते हैं।
फूल, पहाड़, नदी और झरने
कैसे शोर मचाते हैं।
तोता, मैना, चिड़िया, कोयल,
कैसे गाना गाते हैं।
अपनी भोली भाली बातों से
यह सबका मन मोह लेते हैं।
अपना पराया यह न जानें,
दिल में घर कर लेते हैं।
बचपन जीवन की प्रभात है,
मानव जीवन की नींव हैं।
कोरा कागज सा यह बचपन,
हर घर की तस्वीर है।

Perfect in Imperfect:

That brightness that shines
Makes my mind to write lines
That wonderful sparkle and lurk
Makes me realize my luck
That oh! I am able to see
The beautiful sight
Oh! That was a lucky night tonight
That oh so bright, the white planetoid stands
A look on which lets the broken heart to mend!
The craters on the surface remind
Nobody is perfect, nobody is defined
But yet everybody can gleam
In their own ways, at the right time!

Small Things That Make Life Magical

Have you ever experienced that how the small things in our life matter really a lot! We often wait for big things to happen -whether it is about getting good grades or about achieving what we want but we forget the soulful experiences which add radiance to our lives and sometimes it's the smallest ,quietest moments that hold the magic.

Then it could be anything maybe the time you truly worked hard and someone noticed it or got praised for your work , the joy of answering a tough question correctly in the class and getting applauded for your creativity . These are almost invisible victories that lift our spirits high.

In the fast pace and unpredictable world where we desire for big achievements we need to pause and cherish the small sweet moments, the laughter that really holds magical power. These are the small things that look ordinary but hold extraordinary power.

Actually these don't need perfection or audience but they need to be felt.

So instead of worrying everytime about the big enjoy the beauty of present and small moments.

MAITRI PATHAK

Familiar Festivals, Fading Feelings

Festivals still arrive with the same lights, sweets, and excitement. From the outside, everything looks just as it did. But inside, something feels quieter.

It's not the rituals that have changed, but the feeling around them. Conversations are shorter. Everyone's present ,but not fully.

This quiet shift shows up in daily life too. Dinner is shared, but eyes stay on screens. Being together doesn't always feel like a connection anymore.

Something is missing , as if the warmth has quietly moved away. Because festivals aren't in the decorations or the dishes , they live in the quiet moments that connect us.

And maybe, with a little more attention, those moments can return, even on an ordinary day.

My Favourite Book

I am a student of class 9th, and I am thrilled to share with you my all-time favourite book - "The Alchemist" written by Paulo Coelho. This book is a treasure trove of inspiration and adventure. The story revolves around Santiago, a young shepherd who embarks on a journey to find his treasure in Egypt. Along the way, he meets fascinating people like the alchemist, who teach him valuable lessons about life

What I love most about this book is its ability to motivate me to chase my dreams. The writing style is engaging and easy to understand, making it a perfect read for students like me.

My favourite quote from the book is: "When you want something, all the universe conspires in helping you to achieve it." This quote resonates with me because it reminds me that with determination and hard work, I can achieve anything I set my mind to.

I highly recommend "The Alchemist" to all my fellow students who love adventure and inspiration. It's a must-read

1% CHANGE THE BUTTERFLY EFFECT

A small change can lead to massive consequences - this is known as the butterfly effect. Habits, which are routines or behaviours performed regularly, are those small changes that shape our lives over time. A slight shift in your daily habits can guide your life in an entirely different direction. Every day, you make a choice: will your habits make you 1% better or 1% worse? Time amplifies whatever you feed it. Good habits make time your ally; bad habits make it your enemy. These seemingly minor changes are what separate who you are from who you could become. We often overlook small improvements because they don't show immediate results. But when you take control of your habits, that consistent 1% improvement each day compounds - and that's where the butterfly effect begins.

So close your eyes, and realize the power you hold in your hands.

Every selection, every moment, adds to the storyline of your existence. Take a moment to contemplate on the beauty of it all. As Parents of Two I too have seen this BUTTERFLY EFFECT in me and my children.... So let's this 1% effect give best change in every aspect like ourself, family, friends and our school

संस्कारों की शुरुआत: बचपन से नैतिक शिक्षा

बचपन केवल खेल और शिक्षा का नहीं, बल्कि चरित्र निर्माण का भी समय होता है। जैसे गीली मिट्टी को किसी भी आकार में ढाला जा सकता है, वैसे ही बच्चे भी उसी रूप में ढलते हैं जो उन्हें सिखाया जाता है। नैतिक मूल्य और शिष्टाचार जैसे विनम्रता, ईमानदारी, सहानुभूति और ज़िम्मेदारी, बच्चे के व्यक्तित्व की नींव रखते हैं। ये गुण केवल उपदेश से नहीं, बल्कि रोज़मर्रा के व्यवहार और उदाहरणों से सिखाए जाते हैं। "कृपया," "धन्यवाद," और "माफ़ कीजिए" जैसे सरल शब्द उन्हें विनम्रता सिखाते हैं। नैतिक कहानियाँ, खुला संवाद और सकारात्मक प्रोत्साहन बच्चों को सही दिशा दिखाते हैं। जब हम उन्हें सच्चाई, मेहनत और दूसरों के प्रति संवेदनशीलता सिखाते हैं, तो हम समाज के एक ज़िम्मेदार नागरिक का निर्माण करते हैं। अच्छे संस्कारों से संवरता बचपन, और उसी से संवरता है भविष्य।

Raising Resilient Kids in a World That Doesn't Like to Lose

When children say, "It's too hard," or "I can't do this," I gently remind them—that uncomfortable feeling? That's your brain growing. Struggle isn't failure—it's learning in action.

Resilience means bouncing back from setbacks, trying again after mistakes, and adapting when things don't go as planned. In a world that often celebrates only success, we must help kids see that effort and persistence matter just as much.

As parents, we play a big role. In small, everyday moments we can build resilience by:

- Listening without rushing to fix: "That sounds tough. Want to talk about it?"
- Sharing your own failures to normalize struggle
- Asking, "What's one thing you could try?" to build problem-solving skills
- Praising effort, not just outcomes: "You didn't give up even when it got hard."

Resilience isn't something children are born with—it's something they learn. And they learn it best when we walk beside them through the hard moments, not just the happy ones.

Math – Not Just Numbers, But the Language of the Universe!

Mathematics often walks into classrooms dressed like a strict teacher—silent, serious, and sometimes a little intimidating. But allow me to reintroduce it: math is actually the clever comedian of all subjects. It hides punchlines in patterns, makes jokes in geometry, and even throws surprise parties in probability! Let's look at this differently. Math is not just about numbers. It's about thinking. It trains your brain like the gym trains your muscles. Every time you solve a problem, your brain does a little happy dance (you just don't feel it... unless the exam paper is particularly spicy). Don't Fear Mistakes in math are not failures; they are proof that you're trying. The most brilliant mathematicians in history—yes, even Einstein—stumbled many times before discovering something great. Remember, even zero had to be invented! So, don't give up when the going gets tough. The tougher the challenge, the sweeter the victory. In closing, I'll leave you with a little equation of life: Hard Work + Curiosity + A Pinch of Humor = Infinite Possibilities So, next time you open your math book, don't sigh—smile. You're about to speak the language that built pyramids, sent rockets to the moon, and yes—figured out how to split a pizza fairly among friends.

Happy Calculating!
