SEVENTEENTH EDITION

DECEMBER 2025

20TH ANNUAL FUNCTION

अहं परिवर्तनं परिवर्तनं अहम्

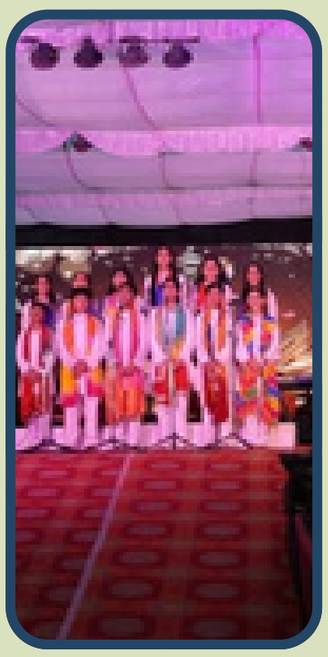

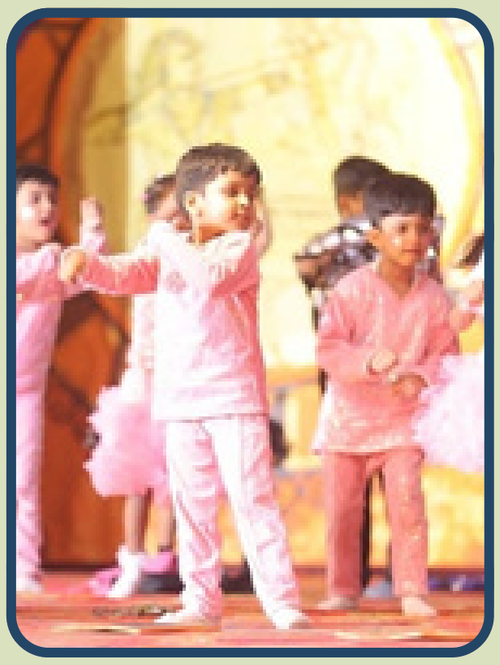

On November 21, 2025, our school joyously celebrated its 20th Annual Function. The theme for this year, "**I Am the Change — Aham Parivartan, Parivartan Aham**," emphasized self-transformation, responsibility, and the power of individual action in creating a better world. The Chief Guest for the evening was Ms. Mala Singh Thakur, a distinguished academic with a Ph.D. in Social Work. The school had the honor of welcoming the Special Guest, CA Rajat Dhanuka, an alumnus of the 2012 batch.
The School also featured an art exhibition on the same day.

Art Exhibition

Bal Vigyan

The BK Passi Memorial Senior Bal Vigyan for the academic session 2025–26 hosted by us , centered around the theme “STEM for Viksit and Aatmnirbhar Bharat”.

Felicitations

Our talented students from Classes III to V participated in the Saint Mariam Theresa Inter School Athletic Meet 2025–26 for the Sub-Junior category, held at Holy Family Convent School.
Avya Shah (Class V) – Silver Medal in 100 metres
Aahana Singh (Class V) – Silver Medal in 100 metres
Karvik Dubey (Class V) – Bronze Medal in Long Jump

The assembly honoring the Hindi Creative Writing winners was a vibrant celebration of creativity and expression. It highlighted how writing nurtures determination, attention, curiosity and passion in young learners.

We are delighted to announce that our Primary Students from Classes III to V participated in the Inter-School Fusion Dance Competition (Junior Category), held at St. Paul Senior Secondary School, Indore and their performance was adjudged among the most impressive top three presentations.

Club Activities

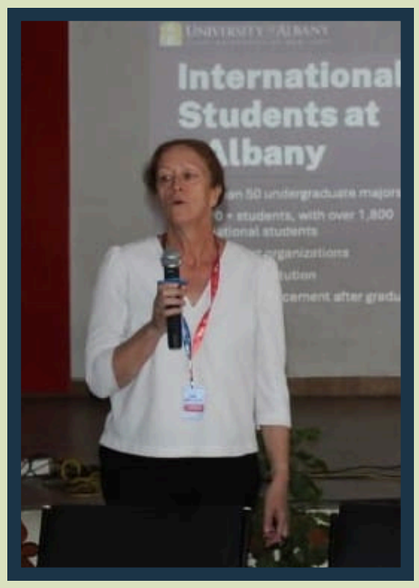

The Quest Club Activity conducted on November 01, 2025, in the Primary Classes of III to V, was a celebration of curiosity, learning and teamwork.

DELL Club hosted the engaging activity “Story Weaving with Pictures” on November 11, 2025.

Conclave

A delegation of representatives from 15 universities across the United States and Canada visited the school to interact with students and guide them on opportunities for higher education abroad.

Laxmi Publications organized an interactive Hindi workshop on the theme “Hindi Grammar Innovation: A Confluence of Expression and Wellness” on November 08 , 2025 at H.R. Resort

DISHA (Developing Insights and Self Awareness for Higher Ambitions) in collaboration with UNOCUE had an orientation session for parents and students of Grade X.

A workshop was conducted by Prof. P.K. Dubey, retired professor from Vikram University, Ujjain, on the theme of “Hands-on Experiments and Demonstrations based on Physics concepts".

As a part of Parent Involvement Program, a session on Happiness was conducted for Classes III to V by Dr. Mayuri Maheshwari.

Learning Beyond Classrooms

The students of Classes XI and XII (Humanities and Legal Studies) visited the Indore High Court Bench as part of an educational excursion. The visit aimed to provide students with practical exposure to the functioning of the judicial system.

Commerce students (Grades XI and XII) of our school visited the Pragati System Plant, where they gained firsthand insights into how iron and steel products including boards, benches, stands and magazine racks are designed and manufactured.

The Students of Choithram School, Choithram International, and Choithram School North Campus, accompanied by Mr. Amit Trivedi, Principal, CSNC, and Ms. Navneet Kaur Bhatia, Science Mentor of Team Mimamsa, explored Japan through a week-long Educational and Cultural Exchange Program with Dalton Tokyo Junior and Senior High School.

Events

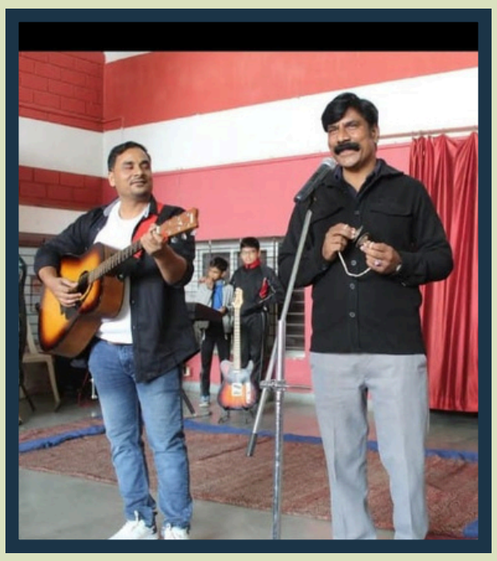

The Inter Choithram Sports Championship 2025–26 concluded with great enthusiasm, outstanding performances and inspiring sportsmanship. We were honored to welcome Ms. Pooja Garg, international para-athlete, cancer survivor and world record holder from Indore. We proudly recognized Anshika Mittal, our alumna (Batch 2023).

Celebrations

Our school brimmed with joy and vibrant enthusiasm as it organized a memorable Children's Day celebration

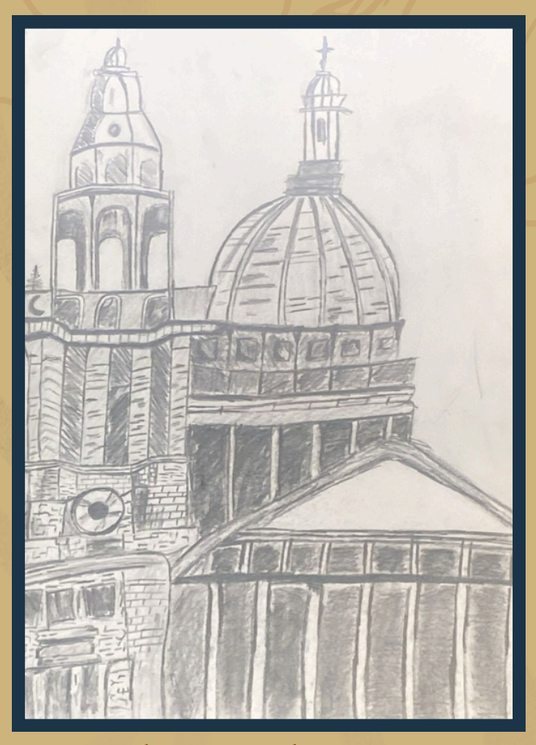

The Primary Wing celebrated World Kindness Day, which is observed globally on November 13, every year, through a special assembly conducted by Class IV B.

Alumni Confluence

Hi, I'm Aditya — I now work at the intersection of psychology and entrepreneurship, helping founders and CXOs stay sane while building companies. I have built 4 startups (in EdTech, ParentTech, Media and Mental Health). I have directed 5 social impact projects (in Education, Healthcare, Cross-border Politics and Sports/Rehabilitation, Hate Speech and Sexual Harrasment Prevention - 3 in India, 1 in Cuba and 1 in Morocco). I have worked with organisations like UNESCO, the U.S. Department of State, USAID. I am also a CBT/REBT therapist and I run a mental health practice....and I hate to introduce myself this way, but turns out I'm too old to use "Aditya Awasthi from 10th B" as my introduction now. Adulthood is weird. It judges you by different introductions - revenue, salary, promotions, LinkedIn headlines, and the number of zoom meetings you've taken this week. School judged us by simpler things: effort, curiosity, and handwriting that teachers pretended to understand. Some of us alumni became success stories. Some are still works-in-progress. Some may never "make it" in the way the world hands out medals. I'm the second type. Work-in-progress. All of you are going to fit into one of these categories when you get to where I am. And honestly? That's fine. Because the world cares about these categories. But school doesn't. Teachers are the only people who take everyone - toppers or troublemakers - with no hiring criteria or job description or salary negotiations - just irrational amounts of faith. There are two more categories my fellow alumni and friends fall in: Those are happy and hopeful in their lives. And those, who aren't. And here's the part adulthood never tells you but psychology very much does: The people who grow up happiest - whether successful or not - almost always had one thing in common: They were happy here. Where you are. They felt safe here. Where you are. They were seen here. Where you are. Success isn't guaranteed. But love, safety, and belonging? Those begin in school. So, if you have to learn anything in your remaining time at school, learn to love it. Learn to celebrate. Learn to fall brilliantly and laugh at your mistakes. Those experiences are so rare - that people are willing to pay me an hourly rate to recreate it in their boardrooms.

Aditya Awasthi
Batch- 2012-13

If someone had told me back in school that one day I would build my own company, I would have smiled in disbelief. I remember reading about entrepreneurship and thinking it was something only a few extraordinary people could do. What I did not realize then was that every dream, no matter how distant, begins as a quiet thought, a spark that takes root when the right people, environment, and guidance come together. Today, as the Co Founder of 4WARD HR Consulting, I help individuals and organizations grow by discovering their potential and building purposeful futures. At 4WARD, we believe in moving people forward in careers, in culture, and in confidence. Whether it is guiding a student to find clarity in their path or helping a company strengthen its people strategy, our work is all about creating impact that lasts. Looking back, school was where the seed was planted, a space that shaped curiosity, courage, and conviction. It taught me that dreams do not come true overnight. They manifest when you nurture them, step by step, with passion and persistence. So to every student reading this, stay curious, dream big, and trust the process. The ideas you imagine today could become your reality tomorrow.

Harshita Malik
Batch- 2012-13

Looking back, I feel immense gratitude towards Choithram School — the place where my foundation was laid, my curiosity was nurtured, and my dreams began to take shape. The school has been more than an institution; it has been the base for my future growth, shaping not just my academic abilities but also my character and values. During my school days, I always strived for excellence and was fortunate to achieve a perfect score of 100/100 in both Social Science and Mathematics in Class 10. This achievement was recognized by the Sahodaya Group of Schools, which encouraged me to continue aiming higher in life. After completing my schooling in 2011, I pursued the professional course of Chartered Accountancy, one of the most challenging yet rewarding fields. Through dedication and persistence, I cleared the CA examinations in 2015, securing 100/100 in Accountancy in the CA IPCC exam and attaining an *All India Rank of 19. I also achieved an All India Rank of 20 in Company Secretary (CS) Foundation Exam. My articleship journey with Arora Banthia & Tulsiyan, a re nowned firm in Indore, gave me invaluable practical exposure. For the past 10 years, I have been practicing as a Chartered Accountant in Indore, specializing in Income Tax, GST, and Audit matters. Beyond professional practice, I had the honor of serving the Indore Branch of the Institute of Chartered Accountants of India (ICAI) — one of the largest branches in the country with over 5,000 members — as Treasurer and Secretary during 2023–2025. To all the young minds reading this — remember, every great journey begins with a single step. Believe in yourself, stay consistent, and never let temporary failures define your potential. The discipline, values, and curiosity you build in school will become the pillars of your success in the future. Choithram has given me wings to fly, and I am proud to say — once a Choithramian, always a Choithramian

Values I learnt from My Friends

As I reflect on my friendships, I realize that my friends have taught me invaluable lessons that have shaped my life. One of the most significant values I've learned is the importance of putting others first and gaining a deeper understanding of the world. My friends have also shown me the value of acceptance; they accept me for who I am, flaws and all. This self-acceptance has allowed me to focus on personal growth rather than trying to fit into someone else's mold. I've also learned resilience from my friends, who face challenges with courage and determination, inspiring me to do the same. Their perseverance has taught me that setbacks are opportunities for growth and learning. Moreover, I've learned the importance of having fun and not taking life too seriously. My friends know how to balance work and play, reminding me to enjoy the moment and laugh often. What I've learned from my friends is that true friendships are built on empathy, acceptance, resilience, and the essence of love. These values have enriched my life, and I'm grateful for the lessons they've taught me. I'm looking forward to continuing to learn and grow with my friends. Friendship is indeed the golden thread that ties hearts together, strengthening values and making life's journey more beautiful..

The Power of Small Choices

Recycling is a huge deal that touches every single one of us, whether we realize it or not. When we toss a plastic bottle into the right bin or separate our paper from the rest of the trash, we're actually giving those materials a second chance to live on instead of piling up in a landfill. It might feel like a tiny habit, but imagine if everyone in our school—or our whole city—started doing it consistently; the amount of waste we could divert would be staggering. Switching to reusable bags, water bottles, and coffee cups might seem like a small shift, yet those little choices add up to a massive reduction in the resources we need to produce new stuff.

How to Focus During Exams

Staying focused during exams requires a calm mind and a clear plan. Begin by organising your study material and setting small, achievable goals for each session. Avoid distractions by keeping your phone aside and studying in a quiet place. Take short breaks to refresh your mind and maintain energy. Practise past papers to build confidence. Proper sleep, light exercise, and a positive attitude help you stay sharp and focused throughout the exam period.

Where the Goddess Smiles: My Visit to Bijasan Mata Temple

During my Dussehra vacation, I got the opportunity to visit the Bijasan Mata Temple in Indore with my family. It is a very famous and ancient temple dedicated to the nine forms of Goddess Durga. Although we reached there in the afternoon, the temple was still crowded with devotees. There are many small shops near the temple selling prasad to offer to the Goddess, along with toy shops for children and several small eateries. At the entrance of the temple stands a huge brass bell, and as we climbed the stairs upward, we saw three large brass lions that looked both majestic and lifelike. The temple is also adorned with several smaller bells whose melodious sounds fill the air with devotion. The entire temple is painted in golden hues, perfectly matching the divine aura of Goddess Durga. When I finally reached the Garbhagriha (sanctum sanctorum) and looked at the Goddess, I felt as if she were truly present before me, smiling lovingly. That feeling was so pure and divine that it's beyond words—one must visit the temple with true devotion to experience that indescribable beauty. My grandmother told me that although the temple is ancient, the current structure was built by Shivaji Rao Holkar. That day at Bijasan Mata Temple will always remain close to my heart. Sharing that sacred experience with my family made it even more special. I hope to visit again and feel the same divine warmth and motherly presence of the Goddess.

Parents' Zone

School

School is the place where children go to be educate and learn so many things and it is a whole other world for children.
kids are like soft clay teachers mould them in beautiful shapes after understanding all uniqueness of kids .
Most of the parents think the best school is the one where school fees is highest in the town and school bags are heavy and so much home work and projects but the ideal one is the one where children go happily and built a strong emotional behaviour learn to take decision and learn almost of the syllabus practically .
For me Choithram school is always the right choice for my both kids where teachers focus on overall development and understand uniqueness of all child...

Importance of Horticulture in India

Horticultural crops include fruits, vegetables, medicinal, aromatic and ornamental plants. They play a vital role in providing food and nutrition security to the Indian people. These crops are important dietary nutritional components and sources of medicines and aroma along with significant aesthetic values for human beings. The cultivation of trees and plants helps to absorb carbon dioxide, reduce air pollution improved soil health, reduce soil erosion and biodiversity enhancement. It also helps to conserve water and conserve energy. It is also an important source of foreign exchange, with a significant portion of the country's horticultural produce being exported to other countries.

Students, Parents & Teachers – A Bond of the Heart

Parents and teachers are the only people who love students without expecting anything in return. A mother's soft voice saying, "Beta, khana kha liya?" and a father's quiet question, "Padhaai theek chal rahi hai?" carry more care than a thousand big speeches.

Teachers too, after long tiring days, still smile and say, "I know you can do better." These simple lines are their silent blessings.

But somewhere in today's busy world, this bond is fading. Students often say, "Abhi nahi… baad mein," forgetting that parents wait the whole day just to talk for two minutes. Teachers give their heart but sometimes get silence in return. The distance hurts, though no one says it out loud.

What students need to remember is that behind every scolding, every reminder, every repeated question—there is only love. Parents worry because they care. Teachers push because they believe.

A gentle "Ji Papa," a soft "Thank you Ma'am," or a warm smile is enough to heal everything. Because in the end, nothing is stronger or purer than the love of parents and the blessings of teachers.

Parents as Partners in Learning

Learning doesn't stop at the classroom door. As a teacher, I've seen time and again how much children benefit when parents and teachers work together as partners in learning. When parents take an active interest in their child's education—reading with them at home, helping with small projects, or simply asking about their day—students feel supported, motivated, and confident.

Parents bring unique insights about their child's interests, strengths, and challenges, which help teachers tailor lessons and activities to meet individual needs. At the same time, teachers guide parents on ways to reinforce learning at home, turning everyday moments into exciting opportunities to explore, create, and grow. This partnership also builds a sense of community. Children see that both home and school care about their learning, which encourages responsibility, curiosity, and a love for discovering new things. When parents and teachers collaborate, education becomes more than memorizing facts—it becomes a shared journey of growth, encouragement, and lifelong learning. Together, we are not just teaching subjects; we are shaping confident, curious, and capable learners.
